- *E3BoothCard2* has a bit of damage between the nose and moustache; likely from a pushpin.
- *PostcardFront2* has some general scuffs and scratches as well as damage to the bottom of the image possibly from tape being removed.
- *Poster* is 2 images stitched together, as it was too big for the scanner.
- I did my best to align each object during the scan, but some had to be corrected after the fact.

Feel free to use them in videos, wikis, etc and thanks for checking this out!
